

## TRADE PARTNERS, SEAKEEPER AND WENCON

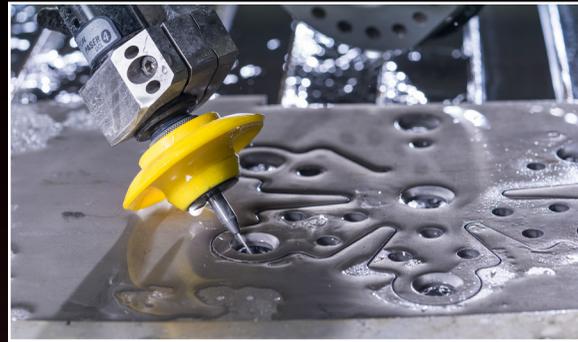

As one of the nation's SEAKEEPER dealerships, we always have the right system ready for installation and our factory trained techs are experts in specifying the right unit for your vessel. We work closely with the factory engineering everything on the water from 23' boats to superyachts with composite, aluminum, or steel hulls. Our services also includes parts, upgrades, and extended warranties.

## WENCON®

APB has long utilized the superior corrosion prevention properties of the WENCON products in the refit and repair of vessels of all sizes. Developed in the seafaring culture of Denmark, WENCON's products provide climate and environmentally friendly coatings for metal and composite surfaces for any type of vessel. Wencon emergency repair kits are standard on most vessels. The versatility of the product line makes it a great addition to the APB tool bench.

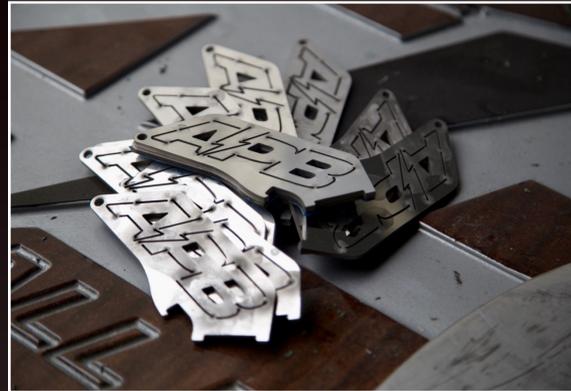

## THE APB EVOLUTION INTO MANUFACTURING FOR DIVERSE INDUSTRIES

Our corporate evolution into the manufacturing business was an easy one to make. With our dedicated staff of technicians, engineers, fabricators, and administrative personnel we can fabricate about anything. APB has made a multi-million-dollar investment by acquiring state of the art manufacturing equipment. This substantial financial investment has changed the entire growth trajectory of the company to the point that APB has now become a leader in reverse engineering and industrial manufacturing in our region.

APB can manufacture products right here right now in the USA with our Flow Mach 500 Waterjet, CNC Router, Press Brake, Plate Roller, and Shear. Our products range from custom metal fabrication for the marine, automotive, and construction industries to exotics such as aviation and pharmaceutical. The services are complimented by our composites, wood, and plastic fabrication that service a multitude of industries. If you can design it, we can build it from prototyping to a final product. APB gets the job done, reducing the headaches of the global supply chain crisis and costs of shipping in from overseas.

## A PERFECT LOCATION TO SERVE YOU!

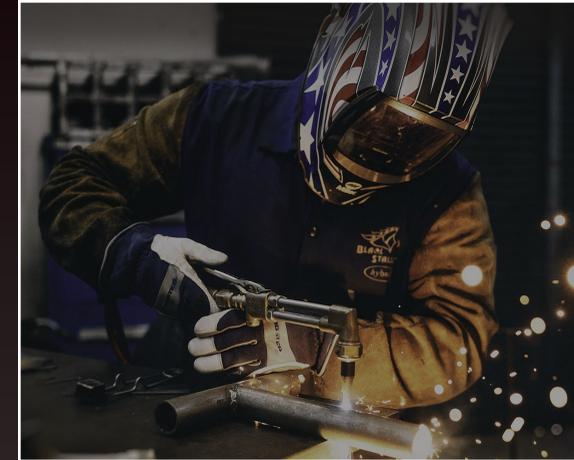

Located in sunny Fort Lauderdale, Florida, APB is perfectly situated in a business-friendly environment with a superb transportation grid, and ports that are perfect for refit, repair, and manufacturing. Our corporate headquarters are easily accessed from I95, the Port Everglades, and major shipyards.

## MANUFACTURE, REFIT AND REPAIR

## MASTER CRAFTSMEN AT WORK

## THE BENCHMARK FOR CERTIFIED REFIT AND REPAIR IN THE MARINE INDUSTRY

For nearly thirty years APB has set the bar of excellence in marine industry refit and repair services. Our reputation for providing a single source of world class marine trade services is the reason why hundreds of superyacht captains and owners call APB their home port of call for complete refit and repair. APB performs certified Lloyd's, ABS, Rina, US Coast Guard certified welding, metal fabrication, plumbing, pipe fitting, joinery, carpentry, rigging, composites and much more, and APB does it all in house! Today, we continue with our proud heritage of service to the elite segment of the marine industry to include forging relationships as authorized dealers for a variety of products and trades. APB builds relationships for companies in the business looking to establish partnerships and service resources.

## FULL SERVICE MARINE INDUSTRY TRADES

### WELDING & METAL FABRICATION

APB welders are Lloyd's, RINA and ABS certified, and deliver Journeymen A-Class quality workmanship.

We work extensively in new construction as well as refit and repair. We are experts in hull plating, exhaust systems, extensions, air intakes, stern tubes, thrusters, overboard discharges, cosmetic and structural modifications, mooring gear, and much more.

When it comes to custom fabrication, our team of techs and engineers have built everything from super structures, hull extensions, and interiors. We specialize in plumbing systems, pipe work, and special surveys fast tracking your vessel back into service efficiently and effectively.

## MOBILE SERVICE

Flexibility is a big part of the extraordinary service we provide. Emergency mobile service teams provide coverage from Savannah to the Caribbean, serving a variety of clients in the marine industry. We have staff and equipment packed and ready for immediate deployment to your vessel. APB utilizes fully outfitted mobile workshops and has versatile capabilities that can reach vessels that require emergency response or personalized assistance.

### REPAIR & REFIT

APB works extensively in new construction as well as refitting and repair. One of our core capabilities has and always will be marine refit and repair. Our services span the entire spectrum of yacht refit and repair, from welding and fabrication to plumbing, valve service, fiberglass refinishing, carpentry and more. Our experienced team of project managers, technicians and master craftsmen know how to do the job the right way the first time, every time.

## FRP/COMPOSITES

With many years of experience, we can work effectively with FRP & composites construction. Our team of techs have years of knowledge they put to work repairing fiberglass, Kevlar, epoxy, carbon fiber and other high-performance products. We also make molds and execute composite modifications and structural repairs. APB has a small tender service and repair center located at our headquarters in Fort Lauderdale where we specialize in retro fitting and repairing all types of center consoles and yacht tenders. We specialize in fabricating and installing new fuel tanks in a variety of vessels as well as re-powering and rebuilding transoms. APB fabricates custom components such as live wells and preparation for Seakeeper installations.

### CARPENTRY/JOINERY

Some of the greatest superyachts in the world are sailing the world with some of the finest custom carpentry and joinery performed by APB. Our work in the fabrication of cabinetry, teak decks, cap rails, and veneering have long set the industry standard for excellence. From complete interior modifications and upgrades to the fabrication of modular designs, the carpentry craftsmen of APB can deliver a work of art for every sized yacht or sportfish.

## MANUFACTURING

The fastest growing segment of APB's business is manufacturing. We deliver old fashioned American manufacturing know how that breaks the supply chain challenges. Our manufacturing equipment includes a 5 Axis 94000psi 10'x 20' Flow Mach 500 Waterjet, 3 Axis CNC Router, CNC Press Brake, 4-Roll Plate Roller, and a high-capacity Metal Shear. We can produce metal, wood, composites, plastics and/or any type of assemblies your design criteria or engineering team require.

### FLOW MACH 500 WATERJET MACHINE

The 5 Axis Flow Mach 500 Waterjet with 3D cutting has the largest cutting footprint in Florida. This incredible machine can increase cutting speed dramatically reducing costs and increasing production figures. With our Dynamic 3D cutting head, our capabilities are endless, and our cut quality cannot be matched. We are specialists in programming your projects and expediting turnaround times.

## CNC ROUTING

The XYZ router features a zoned vacuum bed and is used for machining hardwoods, composites, plywood, plastics, Delrin, nylon, PVC, fiberglass, Garolite, carbon fiber, neoprene, silicone, rubber, aluminum and much more. We have increased our efficiency and product quality and guarantee consistency with multiple part runs. APB provides fabrication services, both for high-end residential as well as commercial and marine applications. Our professional abilities allow us to conceptualize, manufacture, finish, and install any desired project for interior and exterior purposes with the highest attention to detail and precision.

### CNC BRAKE, SHEAR AND ROLLER

Our press brake allows APB to bend complex geometry up to 3/8" thick mild steel while our metal shear gives us the ability to cut materials up to 1/2" mild steel and 3/8" stainless steel. The state-of-the-art CNC Shear, Brake and 4-Roll Plate Roller allows APB to speed up the cycle time to manufacture parts of all types by allowing production to work at maximum efficiency and gives APB the ability to create difficult shapes and geometry at the push of a button.
