

ALL POINTS BOATS: The Trailblazing Force Reshaping the Marine Maintenance Landscape

APB specializes in providing world class manufacturing, prototyping, and repair services in multiple fields, such as welding, finished carpentry, mechanical installations, rigging, plumbing, painting, machining, valve and pipe fitting, hydrostatic pressure testing, FRP repairs, metal fabrication, and installation of machinery and equipment. As supply chains choke out material availability from overseas, APB is solving the problem by reverse engineering, product manufacturing, and refitting right here in the USA.

In the ever-evolving world of maritime manufacturing, few companies have managed to stay ahead of the curve quite like All Points Boats (APB). With a remarkable three-decade history of excellence, innovation and unwavering commitment to customer satisfaction, APB continues to redefine the industry's standards. Always looking ahead at the needs of the market, APB has made significant strides in expanding its service offerings through job shop collaboration and the introduction of new product lines, solidifying its position as a trailblazer in the field.

At APB, the belief in collaboration as a driving force for collective growth is deeply ingrained. In a bold move that defies industry norms, APB has opened its doors to job shop services, inviting competitors and fellow manufacturers to benefit from its machinery and expertise. By fostering alliances with major manufacturers and equipment suppliers, APB has established a network of shared knowledge and resources that ultimately benefit all parties involved. This forward-thinking approach not only highlights APB's confidence in its capabilities but also reflects the brand's commitment to advancing the industry as a whole.

Addressing the Demand for Alternative Power Systems

Driven by a keen understanding of the evolving needs of its clients, APB's portfolio of services has grown significantly. While its expertise in catering to mega yachts, commercial vessels and class certification of vessels is well known, APB's recent foray into new product lines has set it apart from the competition. Recognizing the demand for alternative power systems, APB has introduced the COX 300 Diesel outboard engines. With a focus on safety, fuel efficiency, and impeccable craftsmanship, APB has positioned itself as a leading provider of reliable and environmentally friendly power solutions for the yachting, commercial, and municipal fleet sectors. This strategic expansion showcases APB's ability to anticipate industry trends and offer innovative solutions that meet the ever-changing needs of its discerning clientele.

Specialized Retrofitting

APB's commitment to excellence extends to its dedicated service center, designed specifically for retrofitting and servicing vessels of all sizes. Equipped with state-of-the-art manufacturing capabilities, including advanced composites and marine welding and fabrication expertise, APB ensures that every retrofitting project is handled with precision and unmatched skill. The company's team of master technicians demonstrates its dedication to quality, especially when it comes to the installation of Seakeeper stabilization systems. With meticulous attention to detail and the ability to tackle even the most challenging projects, APB's service center has become the go-to destination for clients seeking exceptional craftsmanship and unmatched expertise.

A Legacy of Adaptability and Client Focus

As APB approaches its 30th anniversary, the company's success can be attributed to its adaptability and devotion to taking client satisfaction to a level of excellence. Whether through collaboration, diverse service offerings, or specialized retrofitting capabilities, APB has consistently demonstrated its ability to evolve with the times. The company's extensive network and resources, coupled with a dedicated team of certified craftsmen, ensure that every project is approached with utmost care and tailored to the unique needs of each client. APB's outstanding history of delivering outstanding results has earned them a loyal client base that values its expertise, reliability and commitment to quality.
